**Re: U.S. Patent Application for:
"Roll Stability Control For An Automotive Vehicle"
Your Ref. No. 199-0438
Our File No. FGT 1099 PA**

Dear Mr. Brown:

Enclosed is a draft of the subject patent application including informal copies of the drawings. Please review all of the documents with your co-inventors to make sure they fully and accurately disclose and claim the invention. Please let me have your comments on the application. If there are any changes that you wish to make to the application or drawings, please give me a call so that we may discuss them.

A patent application must set forth the best mode of the invention known to the inventor(s) at the time it is filed. Thus, if you or the other inventors have any additions or changes to the subject matter of the invention (including the drawing figures) in order to meet this requirement, the application should be amended accordingly. Also, if you have any additional or alternate embodiments or features of the invention, they should be added at this time.

Very truly yours,

Kevin G. Mierzwa
